

SAVE THE DATE!

Ember Stomp: Marin's Wildfire Prevention Festival

SEPTEMBER 7th

Mark your calendars for the 3rd annual Ember Stomp Festival on September 7, 2024. Join us at the Marin County Fairgrounds for an immersive experience into world of wildfire preparation. All your favorites will be back, including goats, face painting, bilingual storytelling, Marin Fire Departments, vendors, local food trucks, and music!

The focus of this year is experiential learning that makes the ideas of home hardening, fire smart landscaping, and preparing for evacuation come alive.

Bigger Burn Demo

A live burn from IBHS (Insurance Institute for Business and Home Safety) will invite you to see the obvious differences that building materials and a cleared Zone 0 (first 5 ft from your home) make to protect your home from wildfire. This is science-backed research that will convince any non-believer in the effectiveness of home hardening. Take a [sneak peak](#) from one of their live burns and come experience it for yourself!

More Games and Family Entertainment

The children and family area will be a hub for fun! Just like preparing for earthquakes is taught in school, our hope is that the next generation can learn all of the ways to adapt to wildfire. Games, art and crafts, and tactile activities will leave the whole family feeling ready to apply the lessons they learned to prepare for wildfire.
