

# Don't Miss Ember Stomp! September 7th Marin Center Fairgrounds 11am - 5pm

As California faces increasingly severe wildfire seasons and hotter, drier summers, the need for wildfire preparedness is urgent. Ember Stomp is an event that offers solutions to residents, showcasing innovative fire-resistant building designs, materials, and the latest products that minimize the risk of ember ignition.

This event will feature a wide array of building and landscape exhibits, complemented by music, great food, and family entertainment. Wildfire education has never been so fun!.

“This year will be very exciting because we have even more examples of home retrofitting for wildfire, and we will provide side-by-side comparisons for audiences to understand how building materials influence fire spread to your house,” said Battalion Chief Todd Lando of Central Marin Fire. The [Insurance Institute of Business & Home Safety \(IBHS\)](#) will conduct a highly anticipated live burn, igniting a fence between two staged houses. You will be impressed by the difference home hardening design and materials can make! The demonstration will begin at 1:30pm. The IBHS team has been traveling around the country sharing this event with fire professionals and we are so lucky to have it in Marin. Check out this feature in the [New York Times](#).

*You will be impressed by the difference home hardening design and materials can make!*

**When you get to the event, make sure to find a schedule so you don't miss the main attractions!**

Live burn demonstrations | Family Entertainment | Fire Smart Landscaping | Home Hardening Expo| Simulation of the 1923 Marin Wildfire | Wildfire Products and Services
