

WILL YOU SURVIVE A WILDFIRE EVACUATION?

Think through these 5 questions to save your life

1. How will you be notified to evacuate?

Sign up for emergency alerts at AlertMarin.org and Nixle.com

2. Where will you go?

The best route is usually on a main road, downhill, and away from the fire. Don't use fire roads. Follow directions from emergency responders.

3. How will you get there?

Get in a car and go as quickly as possible. A vehicle will provide protection from heat and burning embers. If you don't have a car or need assistance, plan ahead.

4. What will you bring?

The most important thing to bring is your life. Grab essentials — medicine, ID, glasses, phone and charger and (if it's already packed) your Go-Kit and GET GOING!

5. Who will you contact?

Once you are in a safe place, call your emergency contacts to let them know you have evacuated.
