

Marin-01 Marlin Ave (Mill Valley) Pine Removal

Shaded Fuel Break, Ingress/Egress Project

Funding Amount

\$33,000

Project Cost

\$27,500 Pacific Slope Tree Company

\$1,400 Pacific Slope Tree Company

\$1,202.50 XMR Fire

\$2897.50 Project Administration Fee, FIRESafe MARIN (8.7%)

\$33,000 Total

Remaining Payment From PG&E

Please pay remaining grant balance of \$16,500

Fiscal Sponsor

FIRESafe Marin

PO Box 2831

San Anselmo, CA 94979

Project Location

37.906956, -122.534250. Near PG&E powerlines located between 100-150 Marlin Avenue in Mill Valley, CA. (APN 029-231-20)

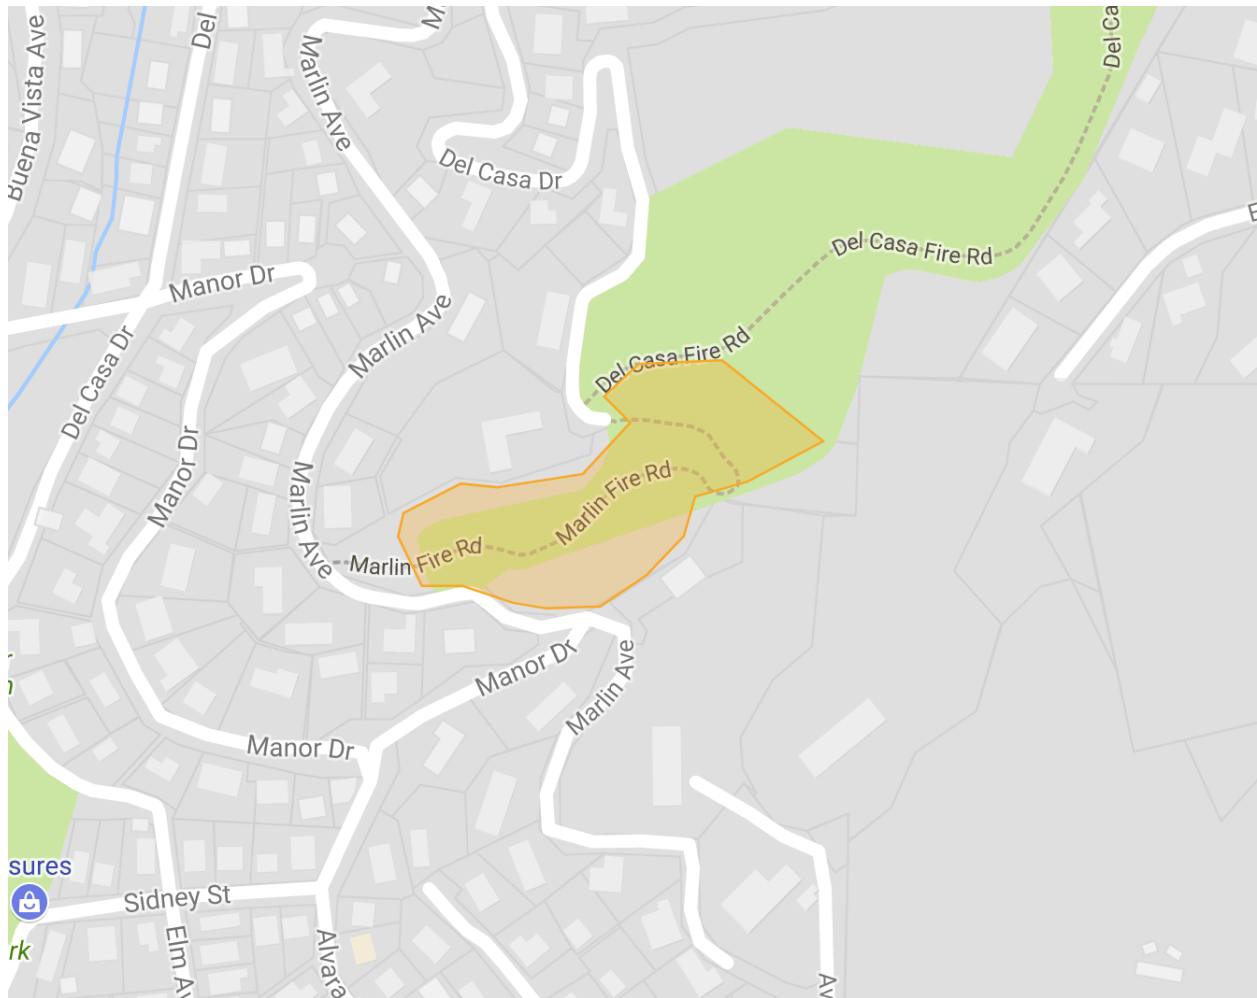

Project Summary/Description

This project was identified through partnership between FIRESafe MARIN, Marin County Open Space District, and Mill Valley Fire Department staff. Marlin Avenue is located in a designated wildland-urban interface (WUI) zone. The area between 100-150 Marlin Avenue consists of multiple single family homes adjacent to a 3.4-acre open space parcel containing several dead/dying Monterey pine trees as well as combustible, dead vegetative material on the ground. Residents have expressed concern regarding the amount of dead/dying pine trees and would like to see them removed. The trees increase the fire hazard to the residents in the vicinity of powerlines. Roughly half of the area is within the 100-foot defensible space zone of nearby homes, and is adjacent to the Marlin Fire Road. The project removed approximately 30 pine trees in various stages of life from saplings to standing dead and/or dying trees.

Work was performed would last between August 14 and 21, 2017.

DURING AND AFTER PHOTOS

TREE REMOVAL

Fire Safety and Emergency Access

Work crews will be removing pines in the vicinity of Marlin Fire Road in Mill Valley from August 14, 2017 through the following week.

The trees targeted for removal are either dying or hazardous. They are being taken out to reduce fire risk, clear contact with power lines, maintain emergency access to the fire road, and create defensible space to protect residential property.

This project is a collaboration between Marin County Open Space District, Pacific Gas & Electric (PGE), Mill Valley Fire, and FIRE Safe Marin. For more information about fire safety, defensible space, and wildfire protection visit firesafemarin.org.
