Shaded Fuel Break, Ingress/Egress Project

Project Status

Complete

Funding Amount

\$16,500

Project Cost

\$15,000 contractual, Forster & Kroeger Landscape Maintenance

\$1,500, Project Administration Fee, FIRESafe MARIN

\$16,500 Total

Remaining Payment From PG&E

Please pay remaining grant balance of \$8,250.

Fiscal Sponsor

FIRESafe Marin

PO Box 2831

San Anselmo, CA 94979

Project Location

37.93199, -122.54892. Adjacent to roadways on Madrone Ave, Wilson Way, Polhemus Way, Redwood Way and surrounding areas in Madrone/Baltimore Canyon in Larkspur, CA.

Project Summary/Description

Madrone Canyon and Baltimore Canyon are identified in the Marin County CWPP as areas of high concern. Roadway vegetation is a significant concern in the upper elevations of the canyon(s), where evacuation and fire apparatus ingress/egress might be impeded by low hanging vegetation of flame impingement during a wildfire. To improve evacuation routes and roadway access for fire apparatus, private contractor Forster, Kroeger and Associates was utilized to remove overhead limbs, remove flammable vegetation from roadsides, and improve roadway clearance.

Personnel from Larkspur Fire Department and FIRESafe MARIN directed contractors to locations of key strategic importance, including primary intersections and narrow roadways.

2017 PG&E Vegetation Management Grants

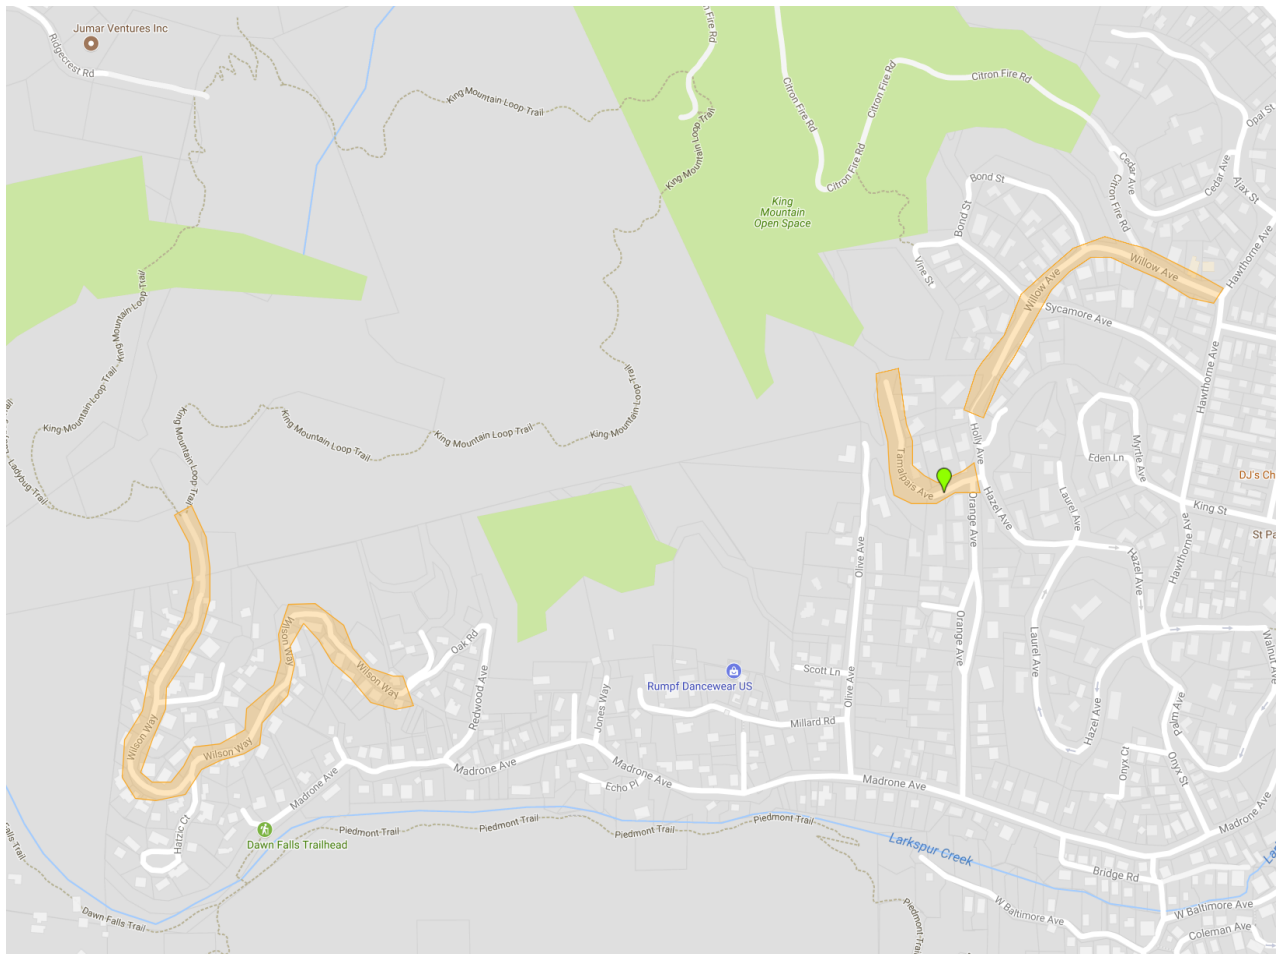

Roadside and overhead vegetation was removed with the goal of improving the safety of ingress and egress routes during wildfires and reducing vegetation near PG&E infrastructure.

Work was conducted primarily on Willow Avenue, Tamalpais Street, and Wilson Way. 10 tons of vegetation was removed.

Work was conducted between August 14 and 28, 2017.
