

When will the Next Wildfire Strike?

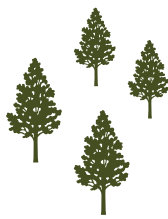

The Marin Wildfire Prevention Authority is racing against an unknown timeline to prepare our community

WHAT HAS THE MWPA DONE?

Conducted over
110,000
Defensible Space
Inspections

Created over
72 MILES
of shaded
fuel breaks

Removed over
2.8 TONS
of fuels per
acre for fuel
reduction projects

Cleared over
53 MILES
of evacuation
routes

**EDUCATED
THE PUBLIC**
about wildfire
risks through
Fire Safe Marin

WHAT'S NEXT?

Target work on the most fire prone areas	Continue the construction of fuel breaks	Maintain and reduce fuel loads	Continue to clear evacuation routes	Motivate residents to take action
--	--	--------------------------------	-------------------------------------	-----------------------------------

WHAT CAN YOU DO?

Open your report and take care of high risk issues	Limb up your trees and clear under bushes	Sign up for the free Chipper Day program	Maintain your vegetation along the roadside	Join Firewise to make your neighborhood safer
--	---	--	---	---

The **Marin Wildfire Prevention Authority** leads the development of fire adapted communities through vegetation management, community education, evacuation and warning systems. The work relies on sound scientific, financial, programmatic, and ecological practices.
