

# GET WILDFIRE ALERTS

**Sign Up at  
AlertMarin.org**

Think through these 5 questions to save your life

**1. How will you be notified to evacuate?**

Sign up for emergency alerts at AlertMarin.org

**2. Where will you go?**

The best route is usually on a main road, downhill, and away from the fire. Don't use fire roads. Follow directions from emergency responders.

**3. How will you get there?**

Get in a car and go as quickly as possible. A vehicle will provide protection from heat and burning embers. If you don't have a car or need assistance, plan ahead.

**4. What will you bring?**

The most important thing to bring is your life. Grab essentials — medicine, ID, glasses, phone and charger and (if it's already packed) your Go-Kit and GET GOING!

**5. Who will you contact?**

Once you are in a safe place, call your emergency contacts to let them know you have evacuated.
